PROFILE

Software developer with 5+ years of professional experience, seeking a quality assurance and testing role. Experience includes unit testing, VR QA, data validation and troubleshooting across production and test environments. Bring a systems perspective to investigating failures, improving reliability and explaining technical issues to colleagues.

CORE CAPABILITIES AND TECHNOLOGY

Unit and system testing | UAT support | Root-cause analysis | Data validation | Requirements analysis | Technical documentation | Collaboration with engineering and QA

SQL and Oracle PL/SQL | Java | C#/.NET | JavaScript/TypeScript | REST/SOAP/gRPC | Postman | Git/Jenkins | Jira/Confluence | Excel | Unity/VR

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | Secret Location | May 2018–Apr 2019

- Added 70+ unit tests and performed VR QA, supporting production changes and usability and reliability improvements.
- Traced data flows across 20+ system components to diagnose cross-layer failures and assist colleagues with debugging.
- Maintained a VR distribution and hosting platform spanning C#/.NET services, gRPC/protobuf, Unity clients and Angular/TypeScript dashboards.
- Collaborated with engineering, QA and UX/strategy teams on technical changes and improvements.

Full-Stack Software Engineer | Paymentus | Dec 2014–May 2017

- Diagnosed issues across production, SIT, UAT, QA and local environments using logs, SQL, remote debugging, configuration analysis and exception traces.
- Implemented data-validation logic; parsed, normalized and mapped vendor records for payment and account data integrations.
- Translated business requirements into Java, SQL and web changes across application layers, resolving conflicting requirements and improving performance.
- Coordinated fixes and releases with development, implementation, operations, business analysis and client-facing teams.

EARLIER PROFESSIONAL EXPERIENCE

Programmer Analyst Co-op | Ontario Ministry of Health | Jun 2011–Apr 2013

- Analyzed IBM Panorama and legacy immunization-system data and fields, identifying gaps and HL7 and storage limitations.
- Developed database queries and worked with immunization subject-matter experts, technical management and IBM database specialists.
- Built a JavaScript/Excel dashboard showing the status of approximately 30 servers, making operational information easier to review.

Sales Associate | RadioShack / The Source | Oct 2003–May 2006

- Tested consumer electronics and investigated reported faults, distinguishing product limitations and setup issues from failures requiring repair.
- Documented failure conditions and reproducibility in repair tickets, assessed when escalation was warranted, and followed up on unresolved repairs.

SELECTED TECHNICAL PROJECTS

Independent AI-Assisted Software Projects | Toronto | 2025–Present

- Directed AI-assisted development of extraction, normalization and refresh workflows for personal analytics, with searchable dashboards linked to source records.
- Developed media inventory and backup-verification workflows, plus queued transcription and searchable outputs.

Scientific Visualization | 2025–2026

- Created Blender technical figures used in two peer-reviewed publications, iterating with researchers from incomplete references to communicate scientific structures and processes.

Independent VR Testing and Feedback | ChefU | 2017

- Tested a VR cooking application on Oculus Rift and HTC Vive, documenting physics, interaction, usability and tutorial failures with specific scenarios and supporting screenshots.
- Prioritized feedback by user impact and ability to complete tasks, considered implementation difficulty, and discussed fixes and workarounds with the developer.

LANGUAGES

French — Professional working proficiency | English — Native fluent

EDUCATION

B.Sc. Computer Science | Toronto Metropolitan University (Ryerson) | 2014

Co-op and Dean's List
